Professional Summary

Backend-focused Full Stack Developer with 2+ years of experience designing and building scalable web applications using Laravel, MySQL, and REST APIs. Strong experience in backend architecture, database optimization, and real-time data processing. Proven ability to deliver production-ready systems in fast-paced startup environments. Actively seeking backend or full stack engineering roles in product-driven teams.

Technical Skills

Backend Development: Laravel, PHP, Node.JS

Databases: MySQL, MongoDB

Frontend: React.JS, Redux, HTML, CSS, JavaScript

Programming: PHP, Python, JavaScript

Tools: Git, GitHub, Postman, VS Code, phpMyAdmin

Foundational Knowledge: Data Analysis, Backend Architecture, Real-Time Systems

Experience

Dec 2024 – **Software Engineer**, *FinScanner AI Solutions*, Ahmedabad, Gujarat

- Mar 2025 ○ Architected backend modules using Laravel for processing large-scale financial datasets.
- Built real-time data processing pipelines to handle high-frequency inputs.
- Designed and deployed REST APIs supporting analytics dashboards.
- Ensured application performance and reliability under increasing data loads.

Jul 2024 – **Software Engineer**, *InstaMed*, Mumbai, Maharashtra

- Nov 2024 ○ Worked on backend development using Laravel to support healthcare-focused web applications.
- Optimized database queries using caching and indexing techniques.
- Integrated backend APIs with frontend systems and third-party services.
- Collaborated with cross-functional teams to deliver features within tight timelines.

Oct 2022 – **Full Stack Developer**, *Vertex Technosys*, Solapur, Maharashtra

- Jul 2024 ○ Improved frontend performance through lazy loading and efficient state management using Redux.
- Built reusable, modular React components to ensure consistency and faster feature development.
- Developed and maintained scalable backend systems using Laravel following MVC architecture.
- Integrated REST APIs with React using Axios/Fetch, handling loading, error, and success states effectively.
- Managed global application state using Redux Toolkit for better scalability and maintainability.
- Designed and implemented RESTful APIs for CRUD operations, consumed by React-based frontend applications.
- Built and tested Node.js + Express APIs for CRUD functionality and authentication as part of feature enhancements and internal tools.
- Integrated authentication, authorization, and role-based access control across backend services.
- Optimized MySQL queries using indexing and query restructuring, improving response times.

Education

Aug 2018 – **Bachelor of Technology (B.Tech) in Electronics and Telecommunications**
Aug 2022 **Engineering**, *N. B. Navale Sinhgad College of Engineering*, Solapur, Maharashtra,
CGPA: 8.37

CERTIFICATIONS & TRAINING

- Accenture Digital Skills: Artificial Intelligence
- Python for Data Science
- Google Fundamentals of Digital Marketing
- SoloLearn: C, Python, SQL
